ENERGY

Sustainable Sandhills Natural Step Training and Workshop May 5-8, 2003

Sustainability Impact Focus Area: ENERGY Team Members: Strategy #1: Five Year Objective: **Current Reality:** End State Strategy #2: 1. The current energy market is: The Sustainable San<mark>d</mark>hills monopolistic, multi-layered, regulated Five Year Objective: and capital intensive. offers an excellent 2. There is a lack of incentives/ quality of life through rewards to reduce energy consumption. reliable, affordable, 3. Current alternative energy sources are cost prohibitive or not and renewable energy. readily available. 4. Major energy sources pollute the environment 5. Dependence on fossil fuels Strategy #3: Five Year Objective:

Current Realities

- 1. The current energy market is: monopolistic, multi-layered, regulated and capital intensive.
- 2. There is a lack of incentives/rewards to reduce energy consumption.
- 3. Current alternative energy sources are cost prohibitive or not readily available.
- 4. Major energy sources pollute the environment
- 5. Dependence on fossil fuels

Desired End State

The sustainable Sandhills offers an excellent quality of life through reliable, affordable, and renewable energy.

Strategies and Objectives

Strategy #1: Develop regionally based alternative energy sources.

Objective A: By 2004, county leaders establish a regional alternative energy working group to develop and facilitate the implementation of a plan for green power.

Objective B: By 2008, the "Sandhills Partnership" will secure funding to support pilot programs using alternative energy sources in residential, commercial and industrial applications.

Strategy #2: Develop conservation incentives to maximize resource efficiency.

Objective A: By 2008, the North Carolina Utilities Commission will adopt market-based incentives to foster energy conservation and renewable energy technologies.

Objective B: By 2008, Sandhills governments will provide economic incentives to all developers who build to LEED (or similar) standards.

Strategy #3: Modify distribution systems and infrastructure to support emerging technologies.

Objective A: By 2008, a map of all existing energy distribution and infrastructure in the Sandhills will be developed.

Objective B: By 2008, all power distributors will utilize net metering to promote the use of alternative energy systems.

ENERGY

Strategy #1: **Develop regionally based alternative energy sources.**

Five Year Objective(s):

Objective A: By 2004, county leaders establish a regional alternative energy working group to develop and facilitate the implementation of a plan for green power.

Objective B: By 2008, the "Sandhills Partnership" will secure funding to support pilot programs using alternative energy sources in residential, commercial and industrial applications.

End State

The Sustainable Sandhills offers an excellent quality of life through reliable, affordable, and renewable energy.

ENERGY

Strategy #2: **Develop conservation** incentives to maximize resource efficiency.

Five Year Objective(s):

Objective A: By 2008, the North Carolina Utilities Commission will adopt market-based incentives to foster energy conservation and renewable energy technologies.

Objective B: By 2008, Sandhills governments will provide economic incentives to all developers who build to LEED (or similar) standards.

End State The Sustainable Sandhills offers an excellent quality of life through reliable, affordable, and renewable energy.

ENERGY

Strategy #3: Modify distribution systems and infrastructure to support emerging technologies.

Five Year Objective (s):

Objective A: By 2008, a map of all existing energy distribution and infrastructure in the Sandhills will be developed.

Objective B: By 2008, all power distributors will utilize net metering to promote the use of alternative energy systems.

End State

The Sustainable Sandhills

offers an excellent
quality of life through
reliable, affordable,
and renewable energy.
